

Introduction of new scanning process of supporting documents .

All documents submitted by customers applying for standard Tier 1, 2, 4 and 5 are scanned at the Visa Application Centre and sent electronically to UKVI.

The new process allows customers to retain their supporting documents during the application process. Apart from an applicant's passport, all supporting documents will, where possible, be handed back at the Visa Application Centre after they have been scanned. Photocopies can be submitted, but they must be clear and legible.

In order to avoid delays in the Visa Application Centre customers must follow the instructions below:

- All documents must be A4 size.
- Any documents which are smaller or larger than A4 size, must be photocopied onto A4 sized paper. This includes the pages of any previous passports.
- All documents must be free from any staples, clips or pins before they are submitted.
- Torn, crumpled or heavily creased documents cannot be scanned and therefore must be photocopied onto A4 sized paper before they are submitted.
- Documents should not be laminated

You must sort and separate the documents that you wish to submit in accordance with the categories set out below. A barcode separator for each of these categories must then be downloaded from the VFS Global website and placed on the top of each set of documents. A list of the relevant documents for each category can be found on the bar code separators.

This must be done before reaching the submission counter at the application centre.

It is your responsibility to ensure that any supporting documents are submitted in the required format. Failure to do so is likely to result in delays at the Visa Application Centre.
