

New visit visa application form, Access UK, is now available in Sinhalese

The new visit visa form, Access UK, is now available in Sinhalese to make it easier for customers in Sri Lanka to apply for their UK visas.

All questions have been translated into Sinhalese, however answers will still need to be given in English. The form is already available in Tamil.

This new form makes it quicker and easier for you as the customers to apply for a UK visa. The benefits include:

- A shorter form, with questions logically ordered based on customer feedback
- The application fee is displayed in the local currency
- Customers can apply, book their Visa Application Centre (VAC) appointment to give biometrics, and pay for the relevant service standard seamlessly
- The service is available on mobile devices
- The form can pre-populate a Schengen Visa application form which customers can then download and print. This makes it much easier for customers applying for both visas at the same time.

Access UK is available for all customers applying for a Standard Visitor Visa, Visitor (Marriage & Civil Partnership), or Visitor (Permitted Paid Engagement) Visa. Access UK is available at www.gov.uk/apply-uk-visa
